

Simon Fresh Water — Admin Billing Portal

Site Navigation Guide · Kikuyu, Kenya

This guide walks administrators through every part of the Simon Fresh Water billing portal — from adding a new customer to generating monthly reports. Every screen, tab, and action is explained in plain language so anyone can run day-to-day operations confidently.

CONTENTS

1. [Signing In](#) · secure access to the portal
2. [Home Page](#) · search & account lookup
3. [New Customer](#) · register a consumer
4. [Terminate Customer](#) · deactivate an account
5. [Consumer Page](#) · readings, payments, statements
6. [Water Bill](#) · per-reading breakdown
7. [M-Pesa Dashboard](#) · payments & callbacks
8. [Bulk SMS](#) · remind overdue consumers
9. [Monthly Reports](#) · download PDF summaries
10. [Settings](#) · manage your admin profile
11. [Legal Pages](#) · privacy policy & terms of use

1

Signing In

From the home page, click the **Login** button in the header (or navigate to `/admin/login`).

- Enter your **username** and **password**, then tap **Sign In**.
- If two-factor authentication (2FA) is enabled, a **6-digit code** is sent by SMS to your registered phone. Enter the code on the next screen.
- After successful verification you are redirected back to the home page, now fully authenticated as an administrator.

Tip: Forgot your password? Use the *Forgot password?* link on the login page. A reset code will be sent to your registered phone.

2

Home Page — Search & Lookup

The home page is your starting point for account operations. The search bar accepts either:

- A **customer name** (e.g. "John Kamau")
- A **meter account number** (e.g. "MTR-0012")

Results appear as clickable cards showing the customer's name, meter number, and current bill status. Tap any result to open the full consumer page.

Note: Searching requires you to be logged in. If you're signed out, a polite prompt asks you to log in first.

3 New Customer

Purpose: Register a new water consumer and open their billing account.

Click the  **New Customer** button in the header. A form opens, and you fill in the consumer's details:

Customer Name	Full name of the consumer	Account Name	Household / business name
Meter Acc. No.	Unique meter account code	Initial Reading	Meter's starting value (M³)
Contact	Phone number for SMS & WhatsApp	Email	Optional email address
Address	Physical location text	Latitude & Longitude	Optional GPS coordinates

✓ CONSUMER CONSENT

Before saving, confirm that the consumer has **given consent** for their personal data (name, phone number, email, address, meter readings) to be stored and used for water utility billing purposes. This consent is required under the **Kenya Data Protection Act, 2019**. Consumers will receive SMS/WhatsApp messages for bills, payment reminders, and account notifications.

Tip: If the meter starts at zero (brand-new installation), leave the Initial Reading as **0**. If the meter already had a value, enter that value so the first bill reflects only the usage since registration.

4 Terminate Customer

Purpose: Deactivate a consumer's account while preserving all historical data (readings, payments, statements).

Click the  **Terminate** button in the header. A search box appears — find the consumer by name or meter number, then tap **Terminate**.

- Terminated consumers are marked **TERMINATED** in red and can no longer submit meter readings or receive SMS reminders.
- Their account page shows two options at the bottom:
 -  **Reactivate** — restores the account to active status.
 -  **Permanently Delete** — erases the customer and all related data (irreversible).

Note: Termination is a soft-delete — nothing is lost. Only the permanent delete option removes data from the system.

Tap any search result to open the consumer's account page. Everything you need for one consumer is on this page:

- **Overview card** — customer name, account name, meter number, contact, email, address, and current bill status (Cleared Due Overdue Prepayment).
- **Edit button** — inline-edit any detail and save changes.
- **Download Statement** — full accounting ledger PDF.
- **Send Bill Reminder** — send an SMS or WhatsApp message with the current outstanding balance.
- **Submit New Meter Reading** — record the current cumulative reading (in M³). The bill is calculated automatically as $(current - previous) \times KES\ 90$.
- **Record Payment** — record a manual payment. Payments are applied to the oldest unpaid bill first (FIFO); any excess becomes prepayment credit.
- **Last 5 Meter Readings** — clickable table; each reading links to its individual bill.
- **Consumption Trend** — visual chart of the last 12 readings.

Click any row in the readings table to view the individual bill for that specific meter reading. The bill shows:

- Reading date and cumulative meter value
- **Consumption** for that reading (current – previous)
- Bill amount (consumption × KES 90)
- Amount paid and remaining balance
- Current status of that specific bill

Use the **Download Water Bill (PDF)** button at the bottom to save or print a formal bill.

Purpose: Automatically reconcile consumer M-Pesa payments to the correct account.

When a consumer pays to the Simon Fresh Water Paybill (**247247**), Safaricom sends a callback to this portal. The dashboard shows:

- **Configuration** — current environment (sandbox / production) and Paybill number.
- **Register URLs** — one-time setup that tells Safaricom where to send payment notifications.
- **Recent Payments** — every payment with status *matched* (auto-assigned to a consumer) or *unmatched* (needs manual assignment).

For unmatched payments, use the **search box** to find the correct consumer by name, phone, or meter number — then click **Assign**.

Auto-matching: Payments are matched to the consumer whose meter number equals the M-Pesa account reference, with a fallback match by phone number.

Purpose: Send bill reminders to multiple consumers with overdue balances in one action.

- By default, the list shows only **OVERDUE** and **OVERDUE_APPROACHING** consumers.
- Tick **Include DUE** to also include recently-overdue consumers.
- Select up to **30 consumers per batch** (protects the SMS gateway).
- Click **Send SMS to Selected** — each consumer receives a personalised message with their name, meter number, and outstanding amount.

Consent reminder: These messages go only to consumers who have agreed to receive billing notifications on their registered phone number.

Purpose: Generate a formal monthly billing report for any past period.

1. Select the **Month** and **Year**.
2. The **Preview** table shows the 20 consumer rows that will appear in the PDF.
3. Click  **Download Report (PDF)** to save the report.

Each report contains: summary totals, total consumption, amount billed, amount paid, outstanding balance, and per-consumer breakdowns.

Period notes: If the selected period is in the *future* or has *no recorded activity*, the portal displays a polite message instead of an empty report.

Purpose: Manage your administrator account.

- **Change Username** — must be unique across the system.
- **Change Reset Phone** — the number that receives password-reset codes.
- **Change Password** — requires your current password; you'll be signed out after changing it.

Security: After changing your password, all other active sessions end automatically — every device must sign in again with the new password.

At the bottom of every page, the footer contains two links:

- **Privacy Policy** — how consumer data is collected, stored, shared, and protected (in compliance with the Kenya Data Protection Act, 2019).
- **Terms of Use** — the rules governing use of the portal, billing calculations, M-Pesa payments, and account termination.

These pages are publicly accessible from every page of the site.

Quick Reference

Billing rate KES 90 per M³

Payment rule FIFO — oldest first

Auto-logout After 30 min idle

Paybill number 247247

Overpayment Becomes prepayment credit

Bulk SMS limit 30 per batch

Thank you for choosing Simon Fresh Water.

Your water is life — let's keep it flowing. 💧
